## TABULA LIMEWASHPAINT

– the key to a natural living environment

The stable lime milk is a mixture of calcium-dihydroxide and water, which is better known as slaked lime. Thanks to its patented technology it does not become sharply lime, and water, the lime component is less prone to sedimentation.

There are several types of Stable lime milk. **Agrolimilk**, a chemical-free agricultural fungicide. **Sunsoftener lime milk**, which is an excellent help for shading in greenhouses or foil tents. **Calcis Antiqua**, which is suitable for restoring monuments. **Sterile lime milk** recommended for bathing livestock feet and painting farm buildings. **TabULA limewashpaint**, which is excellent for painting and whitewashing walls. **Technical grade lime milk**, which can be used for industrial acid neutralization and pH balancing.

# TABULA LIMEWASHPAINT

– the key to a natural living environment

- TabULA limewashpaint is perfect for painting and whitewashing wall surfaces.
- The consistency is creamy, the grain size distribution is homogeneous.
- It is organic and environmentally friendly, has excellent moisture binding capacity, inhibits mould formation.
- It has perfect moisture and breathability properties, reduces condensation.
- It provides an antibacterial, anti-allergic, healthy living environment and a feeling of comfort.
- It has a great disinfecting effect, does not contain any added additives, and chemical-free
- Ready for use, it can be diluted no more than 10-20% with water.
- Its advantage over other lime paints is that it does not indirectly pollute the environment: the production of added materials causes only a small amount of environmental pollution.
- The product is available in 5kg and 15kg plastic buckets and 1200kg IBC containers.
