

SUNSOFTENER LIME MILK

Stable lime milk® is a mixture of calcium dihydroxide and water that does not sharply separate into lime and water, the lime component is less prone to sedimentation. Its advantage is that it has a light outflow property and a steady lime milk consistency. Its peculiarity is that it can be easily stirred after long storage.

There are several types of Stable Lime Milk available. **Sunsoftener lime milk**, which is an excellent help for shading greenhouses or film tents. **Agrolimilk**, which is a chemical-free agricultural fungicide. **Calcis Antiqua**, suitable for painting frescoes, restoring monuments. **Sterile lime milk**, recommended for bathing the feet of farm animals or painting farm buildings. **TabULA** limewashpaint, which is excellent for painting, whitewashing walls.

Technical Stable milk of lime, which can be used for industrial acid neutralization and pH adjustment.

SUNSOFTENER LIME MILK

Solution to burning plants problems

Sunsoftener lime milk is an excellent choice for shading greenhouses or foil tents, reducing the scorching sun and high temperatures inside.

Sunsoftener lime milk creates a medium-weather-resistant coating. It is suitable for painting foil, glass and plastic surfaces.

It can be applied with a spray gun, sprayer or by hand force.

Recommended amount to be applied per hectare (*approx. 20 weeks durability; approx. 70% shading*):

- mechanical application: 500 kg sunsoftener + 1300 liter water
- manual application: 500 kg sunsoftener + 1500 liter water

Product available in 18 kg plastic buckets, or in 1200 kg IBC containers
