## CALCIS ANTIQUA

The stable lime milk is a mixture of calcium-dihydroxide and water, which is better known as slaked lime. Thanks to its patented technology it does not become sharply lime, and water, the lime component is less prone to sedimentation.

There are several types of Stable lime milk. **Agrolimilk**, a chemical-free agricultural fungicide. **Sunsoftener lime milk**, which is an excellent help for shading in greenhouses or foil tents. **Calcis Antiqua**, which is suitable for restoring monuments. **Sterile lime milk** recommended for bathing livestock feet and painting farm buildings. **TabULA limewashpaint**, which is excellent for painting and whitewashing walls. **Technical grade lime milk**, which can be used for industrial acid neutralization and pH balancing.

# CALCIS ANTIQUA

– the antique lime

The Calcis product line includes stable lime products that are stored free of frost for a longer period after production. They are stored in a specially sealed containers. Due to its maturation, the product is easier to use, more economical, has a more elastic texture, has a higher coverage and water retention capacity, and a mortar made from such lime is more durable.

## We offer the following types of matured lime:

Calcis Novus: Lime matured for 3 months, which is recommended for plastering and masonry. The product does not contain any unvaccinated grains, so that we can prevent the development of so-called "lichen".

Calcis Antiqua I: Lime matured for 1 year, from which high-quality lime paints can be produced.

Calcis Antiqua III: Lime matured for 3 years, which can be used to make special high-coverage lime paint, and is suitable for restoration of historic buildings.

Calcis Antiqua VI: Lime matured for 6 years, which is especially recommended for protection of monuments, restoration, frescoes, renovation. It is characterized by exceptional covering capacity and economy.

Aqua Calcis: calcium hydroxide saturated solution, which is perfectly suitable for priming lime paints and reducing the moisture absorption of the surface to be painted. Suitable for diluting Calcis Antiqua products. Aqua Calcis does not contain any natural or synthetic additives.

Product available in 15 kg plastic bucket, or in 1200 kg IBC container.
